

# Resources

Before we begin, make sure you have:

A Hostinger VPS

- KVM 2 (2GB RAM, 1 CPU, 40GB storage) is enough for testing.
- KVM 4+ is recommended for production use.

Operating System

- Ubuntu Server 24.04 LTS installed.

Domain

- Example: `books.aimatrix.one` pointing to your VPS IP.

Email Account

- Example: `books@aimatrix.one`
- With SMTP access (username, password, host, port).

Basic Linux knowledge

- Comfort with running commands in terminal.
